

Innovative Digital Solution e-RUPI

INTRODUCTION

Indian Government on 2nd August 2021 launched 'e-RUPI' which jointly developed by many Government agencies. e-RUPI is Contactless digital Platform to enable payments at any place in country, this Facility will provide users to get prepaid vouchers of the desired amount to complete the payment with the merchants accepting e-RUPI

HOW IT WORKS ?

This new facility works a lot different than UPI where we can just scan the QR code or type the UPI ID of the recipient but in the e-RUPI the users have to create the Prepaid Voucher for the amount of which user want to pay and redeem such voucher without a card, any other app or online banking ,to the Merchants who wants to accept payments in the form of E-RUPI shall get themselves registered with respective platform/App of their bank

It is a Lot simpler than Digital payments, just think of Digital Bearer note of a currency where one user creates it by debiting his bank and he can transfer such voucher to anyone of his family, friends or finally to the merchant, the entire process of this facility is quite faster and reliable as the amount is already deducted/Stored in Voucher but at the same time the said voucher also requires high digital security.

In this Facility the users will be able to Track the Vouchers issued by him and their status of Redemption being issued and authorized by unique verification code, end to end fully digital transaction which does not require any physical contact between any person or medium of exchange i.e Cash or Card.

Beneficiary of the user does not need to share any personal details while redemption to maintain the privacy of its users. The Voucher can be easily redeemed by the recipient due to pre-deduction of such amount with the payee and for the purpose of redemption no Bank or digital presence is required by the recipient intend to redeem such voucher.

BENEFITS FOR CORPORATES

- Corporates can enable well-being of their employees
- End to end digital transaction and doesn't require any physical issuance hence leading to cost reduction
- Voucher redemption can be tracked by the issuer
- Quick, safe & contactless voucher distribution

BENEFITS FOR HOSPITALS

- Easy & Secure - Voucher is authorized via a verification code Hassle free & Contactless payment collection - Handling of cash or cards is not required
- Quick redemption process - The voucher can be redeemed in a few steps and lesser decline due to pre-blocked amount

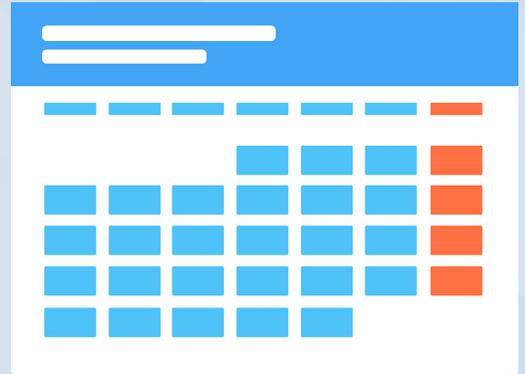

BENEFITS TO THE CONSUMER

- Contactless - Beneficiary should not carry a printout of the voucher
- Easy redemption - 2 step redemption process
- Safe and Secure - Beneficiary doesn't need to share personal details while redemption hence privacy is maintained
- No digital or bank presence required - Consumer redeeming the voucher need not have a digital payment app or a bank account

Banks live with e-RUPI
